

VoIP FaxMe

OneSquared's innovative Fax Me service allows you to receive faxes electronically and have them sent to your email inbox in real time.

What is it?

Fax Me converts all faxes sent to a specified number into a PDF document and forwards them to your inbox as an email attachment.

Product Features:

- All Faxes sent to your email as PDF
- Available on 0800 numbers
- Receive unlimited faxes
- A fax machine that never runs out of paper

Why should you use it?

Fax Me enables you to access crucial information wherever you are. You can retrieve your facsimiles from any place you can access email. The advantage is that even if you are out of the office, you can still access your fax machine. Fax Me also cuts down on paper usage by diverting incoming facsimiles. Think of it as a fax machine that never runs out of paper!

How does it work?

If you do not already have a dedicated fax line, OneSquared

can provide a new number for you. If you have an existing line, OneSquared will set up a diversion through your telecommunications provider.

All faxes sent to this number will divert to the OneSquared server. The server automatically detects your fax number and converts the incoming fax into a PDF file. This file is then sent to your email inbox.

Is it right for you?

Fax Me is available on national and international 0800 numbers and for selected regional numbers for inbound facsimiles.

If you don't have the need for outbound faxing, Fax Me effectively removes the need for a fax machine while also providing an electronic record of incoming correspondence.

Fax Me is also perfect for businesses with employees who are frequently out of the office but require regular reception of faxes.
