

## Internet Connectivity

A reliable, high speed network is crucial to the smooth running of most businesses. OneSquared specialises in fast, reliable, flat-rate internet connectivity

### What is it?

OneSquared connectivity services link you to the rest of the world at the highest possible speeds.

Product Features:

- High speed access
- NZ / Australia ethernet
- Flat rate Internet bandwidth
- Optional leased router– provisioned, installed, supported and maintained by OneSquared
- Monitoring and Reporting
- Project Management

### How does it work?

Get from your office to our back bone using the fastest access circuit as you can! Connectivity options range from Metro Fibre Optic Networks, Digital Microwave Radio, Wifi, and Frame Relay.

After selecting the appropriate connectivity, we then work with you to select the correct Internet bandwidth option on a flat-rate plan.

Our internet plans connect you nationally and globally at high speeds. You can customise your internet connection by combining one of our international plans with one of our national plans.

#### INTERNATIONAL PLANS:

**Burst** allows you to burst up to a level of international connectivity that you choose. Don't worry, your national access is at your network speed (up to 100Mbps).

**Connect** guarantees you a minimum service level with dedicated amounts of National and International bandwidth

allocated to you, so you can be assured that you are accessing the global internet at the performance level we promise.

**Transit** gives you guaranteed bandwidth at Mega Speeds. You get all of what you buy for international bandwidth available up to 100Mbps, 1Gbps or 10Gbps.

#### NATIONAL PLANS:

You also have the option of integrating your office connectivity with one of our backbone plans so you not only have access to the Internet but a NZ internet backbone at up to 100Mbps.

**Base** is part of your Internet access plan and gives you access to the NZ internet at up to 100Mbps - BEFORE you start using your international bandwidth.

**Plus** gives you guaranteed service levels on our network in terms of latency and packet loss for organisations wanting to build inter office VPN tunnels.

**Premium** gives you a SLA plus connectivity speeds of up to 1Gbps.

### Will it suit me?

If you want internet connections where speed and reliability are important to you - bundled with service level agreements and professional support - talk to OneSquared.
