

Dedicated & Virtual Servers

OneSquared provides the complete solution for your hosting needs whether it be dedicated or virtual servers. Based upon your requirements, OneSquared sources and deploys the hardware and software that make up your Internet hosting platform.

What is it?

OneSquared provides dedicated infrastructure servers or virtual server environments to run your online presence. Based upon your requirements, OneSquared sources and deploys the hardware and software environment to give you the ultimate hosting platform.

Product Features:

- Platform procurement and build
- Datacentre and Firewall services
- Windows 2003/8 or, Ubuntu Linux
- Microsoft SQL or MySQL
- 3 Free IP addresses
- Bulk Disk and Traffic
- Hardware upgrades and custom solutions
- Monitoring and reporting
- Optional System Management
- Back up options to disk and tape

How does it work?

Co-location allows small to medium businesses to get onto the same IT playing field as their larger counterparts. You enjoy: For online solutions that have moderate traffic or CPU requirements, choose from one of our virtual server plans for a robust and scalable infrastructure solution.

Where you need high levels of processing or traffic loading we recommend dedicated servers and we provide a number of standard dedicated environments for your convenience. We can also build a custom solution to meet specialised requirements.

Virtual Server Environments

Product	Blue	Silver	Gold	Platinum
Ram	256MB	512MB	1GB	2GB
SAN Disk	5GB	10GB	20GB	50GB
CPU	256 MHz	500 MHz	1 GHz	2 GHz
Traffic	20GB	40GB	100GB	200GB

Dedicated Server Environments

Base Configuration	
Manufacturer	DELL or HP
Operating Systems	Windows / Linux
Processor	Intel Dual & Quad Core
RAM	4 - 64GB DDR2
Hard Drive	SAS 10-15000rpm disk, RAID X
Included Bandwidth	100GB National / 10GB International

How does it work?

Our Mission Critical Managed Solutions are a must-have for organisations for whom the internet is their lifeblood, including e-commerce companies, ISPs and online service providers. We have a range of scalable solutions giving you access to single servers in a secure environment through to fully managed redundant infrastructure.
