

Servers & Co-Location

We provide the highest levels of quality with a secure environment and the best equipment, management, support and service to maintain your online presence.

How does it work?

You choose from a tailored suite of standard products and services to customise a solution to meet your needs.

Services include:

- Co-location
- Dedicated and Virtual Server hardware
- Full System Management
- High Level Security and Firewall Management
- Traffic and Bandwidth plans
- Payment services

A team of dedicated IT professionals monitor and maintain your systems around the clock, 365 days of the year.

Why should I use it?

Your business is built around the online world and any disruption to your IT infrastructure could effectively bring the business to a standstill. You need a provider with the technical expertise, staff resources, and industry partners to keep your business in operation.

Will it suit me?

Our Mission Critical Managed Solutions are a must-have for organisations for whom the internet is their lifeblood, including e-commerce companies, ISPs and online service providers. We have a range of scalable solutions giving you access to single servers in a secure environment through to fully managed redundant infrastructure.
